Professional Summary

Frontend Developer with 3+ years of experience specializing in React, Next.js, and modern JavaScript frameworks. I create clean, user-centric web and mobile experiences, and have delivered full-stack solutions using Node.js, Express, MongoDB, PostgreSQL, and Prisma. In addition to development, I manage my own projects, support team members technically, and maintain direct communication with clients to gather requirements and provide updates. My work blends strong UI/UX focus with backend efficiency to deliver scalable, high-performing applications. Passionate about performance optimization, content-driven systems, and continuous learning.

Skills

Frontend

- React
- Next.js
- JavaScript
- TypeScript
- React Native
- Expo
- HTML 5

CMS

- Payload CMS
- Strapi CMS
- Prismic
- WordPress
- Oracle Commerce Cloud
- Webflow

Tools

- VS Code
- Visual Studio
- Cursor

Backend

- Node.js
- Express.js
- MongoDB
- Postgres
- Firebase
- Json Web Token (JWT)

Styling

- Twailwind CSS
- SCSS
- LESS
- Material UI
- Ant Design
- RNUILIB
- Figma
- Git
- Azure
- REST APIs

Work Experience

Company: TwoCX – Role: Full Stack Developer

From: 2022 - To: Present

At TwoCx, I serve as a Full Stack Developer, where I develop modern and responsive web applications using React and Next.js for the frontend and Node.js with Express for the backend. My responsibilities include collaborating with designers and product teams to translate concepts into functional and scalable digital experiences. I also contribute to the creative side of the business by designing websites, business cards, flyers, and social media content, helping brands establish a strong and consistent visual identity. In addition to development, I manage project tasks, support team members technically, and communicate directly with clients to gather requirements, provide updates, and ensure alignment. This role allows me to combine both technical and design skills to deliver end-to-end solutions. I've worked on improving performance, accessibility, and design consistency across multiple projects, ensuring a seamless experience for users and better outcomes for clients.

Key Projects

Woosooq

Frontend Developer - Oracle Commerce Cloud, KnockoutJS, LESS

- Created a fully responsive and user-friendly B2B e-commerce UI for Napco National.
- Developed dynamic interactions using KnockoutJS and styled using LESS for brand consistency.
- Integrated frontend components with Oracle Commerce Cloud.
- Supported internal tool UIs for product/order management.

Investors Group LB

Full Stack Developer – Next.js, Strapi CMS, Node.js, Refine, SEO

- Designed and developed a sleek, responsive real estate site using Figma, Next.js, and TailwindCSS.
- Built a custom admin panel using Refine for internal project management.
- Integrated Node.js backend Strapi and CMS for dynamic content delivery.
- Delivered a luxury feel aligned with the brand's premium real estate focus.

Hijaz Hospital

Full Stack Development and Design – Payload CMS, Next.js, Tailwind CSS, JazzCash Integration, SEO

Hijaz Hospital is a healthcare organization accepting donations to support its services. I designed and developed the entire website from scratch using Figma and implemented it using Next.js for the frontend and Payload CMS for content management. The site is fully responsive, optimized for performance, and tailored to deliver a clean, accessible user experience for donors and visitors.

A key feature of this project was integrating the JazzCash payment gateway, enabling donations via mobile number or credit/debit card. I implemented payment processing using Next.js API routes, handling both the JazzCash callback and IPN (Instant Payment Notification) securely and reliably. This allows the hospital to receive donations in real-time and maintain transaction records effectively. Tailwind CSS was used to ensure a modern and consistent UI design throughout the site. This project showcases my ability to lead a project from design to deployment, including third-party integrations and backend API work.

[ProntoSIM](#)

Mobile App Developer – React Native, Firebase, Android, iOS, Push Notifications

- Built a global eSIM app UI for iOS and Android using Bare React Native.
- Integrated Firebase for real-time features, authentication, and push notifications.
- Added social login support and local storage for better user experience.
- Delivered fast, intuitive performance for international travelers.

[Ziyara App](#)

Mobile App Developer – React Native, Expo, RNUI LIB, Social Login

- Developed a contact management app UI using Expo and React Native.
- Implemented features like dynamic folders, shared notes, and profile details.
- Built a responsive, intuitive UI for smarter contact organization.
- Helped improve app UX through feedback-based refinements.

Education

Bachelor of Computer Science - Iqra National University, Swat

College FSC - Mingora Degree College

Primary and Secondary School - Allama Iqbal School, Bara Bandai

Languages

- English — Professional proficiency
- Urdu — Native
- Pashto — Fluent

Soft Skills

- Strong communication and collaboration
- Problem-solving and critical thinking
- Attention to detail and UI/UX sensitivity
- Time management and project ownership
- Adaptability and eagerness to learn
- Creative thinking in both code and design
